EXPERIENCE

Bitwise (Alpha Works), Remote — *React Apprentice*

MARCH 2022 - PRESENT

- Developed apps with React Hooks
- Implemented Typescript, ESLinter, prettier, Redux, async thunks, and GraphQL
- Utilized with fetch and Axios for sending HTTP requests to API servers
- Acquired knowledge of Git, GitHub, branching and git flow
- Obtained skills for Angular, WordPress, and .NET
- Built a multiplayer video game using React, Phaser, Redux, Express, Socket.io, and MongoDB
- Created a social media web app using React, Redux, Express, AWS, Socket.io, and MongoDB

EDUCATION

Cal State University, Stanislaus — *MBA - Finance*

May 2022

GPA 3.82

University of the Pacific — *BS Business Administration*

MAY 2020

PROJECTS

FortNerf — *Multiplayer Game Capstone Project*

- Built multiplayer top-down shooter game utilizing Phaser with React and Redux
- Implemented Socket.io for user interaction and MongoDB for storing user information
- Managed state across multiple scenes in Phaser
- Included a live messaging system in-game and character costumes changes

Socialize — *Social Media App*

- Built a full-stack application utilizing Typescript, Redux, and server with Express
- Implemented AWS for user image uploads
- Incorporated live commenting using Socket.io
- Implemented a like system for each post in the application

Waffle Hacks App — *WaffleHacks*

- Built during a hackathon using Java Swing for UI and Ruby on Rails for backend
- App includes signup/login app where users could view recipes
- Learned how to make API calls from a Java Swing App and gained understanding of MVC on a backend server and managing a Ruby on Rails project

PROGRAMMING LANGUAGES

JavaScript

TypeScript

Java

Python

LIBRARIES & FRAMEWORKS
